GENERATE WEALTH FROM WASTEWATER

$9 BILLION

PERMIAN BASIN DISPOSAL MARKET OVER THE NEXT DECADE

WATER
is by far the largest byproduct by volume, generated from oil & gas

COSTS
water management is up to 50% of a well's total operating budget

GENERATES
15-25M barrels of water a day and is expected to rise to 50M by 2023

PERMIAN BASIN
became the largest producing oil field in the world in April 2019 surpassing Saudi Arabia Ghawar field

Investors benefit from tax savings and steady cash flow, which is not dependent on oil pricing. Water disposal is sometimes referred to as the ATM of the oil patch and is not correlated to the overall stock / bond market.
